

Field Technician / Site Engineer

Engineered Solutions International, LLC is looking to hire a field technician or site engineer. We are located in Atlanta, GA; however, the initial assignment will be out-of-town in Americus, GA (Monday through Friday for about 10 weeks). We are hopeful that the position would continue after the initial assignment; however, at this point the position is short-term. Since the initial assignment is expected to run over the summer it could accommodate an engineering student.

The primary focus of this position is on the Water System Engineering side of the company. Cross training on Forensic Inspections will be a future goal of this position. On the job training will be provided for the position in the primary work area, which is site inspections. The applicant should be technically minded and already possess strong skills with scheduling, report writing, office software, etc.

Requirements/Skills/Abilities:

- Physically able to perform site inspections or report writing for a full day (Ability to sit or walk for 8 hours/day).
- Ability to communicate and interact effectively with end users and customers.
- Ability to work effectively on a project team and to facilitate team production is critical.
- The Applicant shall be able to solve problems efficiently and achieve the program goals.

Desirable Qualifications:

- Prior experience in plumbing, pipeline or general construction projects.
- Minimum of BSME or five years of experience with emphasis on mechanical systems.
- Strong communication capabilities are essential along with experience in working on a team.
- Experience in information management, database input and writing reports is required.
- Familiarity with MS Office software is essential. Familiarity with CAD, web design and other computer skills are desirable.
- Preference given to EIT / FE candidates with secondary preference given to NICET certified technicians.

Education: BSME preferred for Full-time.

Mechanical Engineering student or five years experience would be considered.
